Do you have Parkinson's Disease and are you having trouble walking?

You may be eligible to participate in a research study.

Researchers at Duke are studying the effectiveness of visuospatial training on episodes of freezing of gait, a sudden slowing or halting of walking when encountering narrow spaces or turns or having difficulty initiating walking, in persons with Parkinson's Disease.

You may be eligible to participate if you:

- You are over 18 years of age
- You have a diagnosis of Parkinson's Disease
- You can walk at least 200 feet independently without an assistive device

Research study requirements:

- 4 assessment visits over a 6-week period
- An in-home 30-minute visuospatial training task 5-6 days per week
