

cre·scen·do *verb* to increase in loudness or intensity

crescendo

Crescendo was created for individuals with Parkinson's disease and their care partners to address Parkinson's-related vocal decline.

In each weekly session, group members engage in 45-minute group music therapy sessions focused on maintaining or improving respiration, phonation, resonance, and articulation.

To learn more about this group, or to sign up for our current season, please visit www.atlanticmusictherapy.com/crescendo
